## Sandblaster Eclipse II, Eclipse II-T and Automatic

Sandblasting machines made of high resistance ABS.

**Eclipse II:** Classic 2-cup sandblasting machine specialized in microblasting.

**Eclipse II T:** Similar to the previous one, but with a fixed gun, as well as a large capacity hopper.

**Eclipse Automatic:** The skeletons are deposited in a basket that rotates by the action of the motor. The blowing nozzle is adjustable in three dimensions of space. The basket is disassembled easily for the preparation of work, and has a large capacity hopper.

- ✓ Work pressure 2 to 5 bar.
- ✓ LED light

## Pressure former PlastPress

**NEW**

Sheets  $\varnothing$  from 126 to 131 mm  
Sheets  $\varnothing$  from 125 to 134 mm

REF. 080544

**909 €**

The most compact positive pressure machine on the market.  
Greater accuracy in the forming process and lower noise compared to vacuum machines.

Practical and versatile, it accepts round and square sheets up to 6 mm thickness.

It must be connected directly to a compressor (between 3 and 8 bar).

### Specifications

Height 270 mm  
Width 235 mm  
Depth 265 mm  
Weight 7.5 kg  
Power 450 W

Height 310 mm  
Width 275 mm  
Depth 260 mm  
Weight 4.6 kg  
Power 925W

## Thermoforming sheets

Standard square and round thermoforming sheets. Made of high quality plastic with CE marking certification as medical device.

There is no soot, nor fumes during the heating. As they do not contain recycled materials, they do not tear while subjected to vacuum.

Available in a wide variety of thicknesses and types.

Supplied in metalized package and vacuum closed.

CE Medical device

## Suction unit

### Sirocco S

Incorporates two stages of filtration: a first circular HEPA (High Efficiency Particulate Array) filter and a second internal HEPA filter. The unit also features an external micromotor detection system and seven different power levels.

Together with the finishing box, they form an extremely useful and reliable partnership for a clinic environment, allowing for minor polishing and reworking operations.

- ✓ Powerful induction motor
- ✓ Intuitive touch keypad
- ✓ Easy to use and change filter
- ✓ Large screen and access
- ✓ Exceptionally quiet
- ✓ LED lamp for perfect illumination
- ✓ Great working ergonomics

#### Specifications

## Suction unit

### Sirocco M and L

These are two robust, quiet and highly reliable suction units, the M model being particularly practical for use under the workbench and the larger capacity L model very useful in CAD/CAM suction systems.

Its brushless motor extends its service life by five to ten times compared to traditional models.

They incorporate a connection for an external micromotor and a milling machine that will operate synchronously with the suction unit. In addition, its ergonomic design with handles and wheels facilitates its use and mobility in the clinic and laboratory.

- ✓ Extensive set of fully compatible accessories
- ✓ Exceptionally quiet operation
- ✓ Easy to use and change filter
- ✓ CAM cable interface
- ✓ Filtration grade ULPA U15

(reusable filter 4.3 l)

(reusable filter 7.5 l)

## Suction unit

### Eolo Induction

Its new "brushless" induction motor extends its useful life between 5 and 10 times compared to traditional models, and has an innovative double filter system optimized for work in the dental laboratory (including abrasives such as aluminum oxide). It can be mounted with HEPA filter.

It easily adapts to the laboratory furniture, filling a minimum space. In addition, the ergonomic design facilitates its use and mobility. The electronic control with LCD screen is equipped with protection systems against overloads or obstructions in the suction mouth and with a visual indicator of the filter filling level and the detection of the micromotors.

It allows manual or automatic operation synchronized with up to 3 different devices (sandblasters, micromotors, etc.). The detection and adjustment of micromotors is carried out by the electronic control itself, which allows detecting any micromotor, including those of the "brushless" type.

The Vulcano family of furnaces has been developed as an economical alternative to MESTRA's standard ovens.

The only difference between a Vulcano oven and its equivalent in the standard range is in the electronic control, keeping the rest of the components and functions.

Its LCD screen provides all the information necessary for programming and job monitoring.

## Iris Vacuum blenders

Economical and useful vacuum mixer. Just place the bowl and press the operation key and the mixer will start up. In a few seconds the mixture will be ready.

As there are four versions available, you will find the model that best suits your needs. Despite the differences in their control system, all the versions share the same motor-pump-chassis structure of well known solidity and reliability.

**Iris II**

## Optional support

REF. 080519

MODEL	IRIS II	IRIS II EVOLUTION	IRIS II EVOLUTION INVERTER	IRIS II EVOLUTION ADVANCED
Time range	0/120"	0/300"	0/300"	0/300"
RPM and rotation	240 ↺	100 - 400 ↺	100 - 400 ↺	100 - 400 ↺
Power	100 W	100 W	100 W	100 W

The IRIS vacuum mixer has been designed to be hanged on the wall. However, whenever it is no possible, there is an optional support available.

## Water-plaster Boomerang Precision II dispenser

Optimized version of the Boomerang dispenser, with a new quieter peristaltic pump, a more precise weighing algorithm and a backlit alphanumeric display that allows a more intuitive and simple operation.

Just press a button, and you will obtain a dose ready to be mixed. Besides its speed and precision, another advantage of this product is the saving of materials: when you dispense by hand, the trend is to increase the dose. However, with the Boomerang dispenser you will always obtain the exact dose, and the subsequent saving.

According to our experience and estimates, the saving would be between 25 and 40%, quite important amount that will enable you to pay off the machine in a very short time.

The machine has an electronic control which allow to alternate different types of powder (type II, III and IV) by just replacing the tank, to programme cycles, to work with fixed proportions, and so on.

They are factory supplied with a rubber bowl to mix the plaster and a plastic spatula. Apart from that, an extra plaster tank (to alternate different types of powder) and a bracket to fix it to the wall is also included.

### Specifications

Height 700 mm • Width 350 mm

## Solution for electrolytic bath

High quality product. It has been formulated to minimize its toxicity, when the safety measures and recommendations for use are followed.

Using it together with electrolytic baths of the type dental and/or jewelry, the quality achieved is excellent. In addition, it remains without degrading for many cycles of use.

Its viscous texture prevents splashing and makes it much easier to clean up accidentally spilled debris.

## Standard face bow

REF. 010102-50

92 €

The standard face bow is an apparatus used to record the spatial position of the patient's upper dental arch in relation to the skull and transfer the record to the articulator.

Transfer of the patient record is performed by setting the complete face bow in the upper frame of the articulator.

**MESTRA**  
by bioart

CE Medical device

## Elite face bow

REF. 010100-55

193 €

The new elite face bow brings an articulated and fixation system for the fork that allows a faster registration process for the professional and comfortable for the patient.

It has a jig transfer assembly that eliminates the needs for face bow in the assembling process of the casts in the articulator, turning the process faster, more practical and stable.

Its nazium relator with adjustable height, including an infra-orbital indicator, turns the registration process more precise.

Is equipped with a sliding system which allows smooth lateral movement (opening/closing) and facilitates the overall use. The ear pieces are anatomical, removable and chemically sterilized.

## Work chairs

Work chairs specially designed for the dental laboratory. Comfortable, ergonomic and easy to clean. Allow one seat height adjustment. With this regulation it is very easy to find the ideal work posture, regardless of the height or physical constitution of the user. The material used in its manufacture is spongy polyurethane in black. Due to its flexibility, properties and texture, this material allows you to combine excellent comfort while being very easily washable and resistant to wear and tear of use.

## Polishing discs and burs for zirconia

We present two kits of diamond discs and burs, specially designed for pre-polishing and high-gloss polishing of zirconia inlays and veneers, without the need for glazing, polishing paste or water cooling. Check prices if you want to buy a bur to round off the kits.

- ✓ Recommended working speed 10 000 - 15 000 rpm
- ✓ Their shanks have a standard diameter of 2.35 mm
- ✓ They are autoclavable at 135°C

## Lamp for zirconia drying

The zirconium drying lamp is an infrared lamp with thermal radiation. It is used to dry the zirconia structures after immersion in the coloring liquid, to avoid corrosion of the sintering furnace resistances due to the acid contained in the liquid.

The drying time of the frameworks depends on the type of framework.

Made of aluminum.

### Specifications

Max. height 705 mm  
Min. height 560 mm  
Width 350 mm  
Depth 380 mm  
Weight 1.2 kg  
Power 275 W

## Spray for laboratory scanner

Indispensable to achieve an optimal scan, increasing the resolution of the areas with the worst reading in a model.

Color and texture have been formulated to be very sharp at the lighting frequencies commonly used by dental scanner projectors.

Drying times are extremely fast, which improves productivity.

Debris sprayed on unwanted surfaces can be easily cleaned.

The package contains 200 ml.

## Dry piston compressors

**CERTIFICATE by TÜV SÜD**  
Type certificate  
N° 12202200491258001  
Directive 2014/29/UE  
(Pressure vessels)

Family of compressors consisting of two sizes of 80 and 160 litres/minute to which a dryer with automatic drain can be coupled. Extremely quiet operation (60 dB), easy maintenance (dry piston) and excellent reliability. They are supplied with two pressure gauges (boiler and service pressure), outlet pressure regulator and complete set of valves for draining. The service pressure can reach 8 bars.
